ABOUT ME

Highly motivated IT student in the final stage of my Higher Degree in Systems Administration (ASIX). Alongside my strong foundation in networking and databases, I have recently developed a great passion for Cloud computing and Infrastructure as Code (Terraform). I am incredibly excited to move to Poland this September for my Erasmus exchange program, while also starting an official Specialization in Cloud Services. I am looking for a welcoming internship environment where I can learn from experienced professionals, contribute my enthusiasm and fresh skills, and fully embrace this international and cultural experience.

EDUCATION AND TRAINING

Técnico Superior en Administración de Sistemas Informáticos en Red (ASIX)

Institut TIC de Barcelona [12/09/2024 – Current]
